2nd Annual Central Texas Dental Symposium on Pediatric Medical Updates
Saturday, September 17, 2011

Seton Healthcare Family
Administration Office • St. Vincent de Paul Auditorium
1345 Philomena Street • Austin, Texas 78723

Presented by Dell Children's Medical Center of Central Texas
www.dellchildrens.net/dentalsymposium
Welcome to the 2nd Annual Central Texas Dental Symposium!

Dell Children’s Medical Center of Central Texas cordially invites you to the Second Annual Central Texas Dental Symposium on Pediatric Medical Updates. This continuing dental education experience will feature topic presentations by pediatric medical specialists for dental professionals: Sleep Apnea, Epilepsy, Pediatricians and Oral Health, Obesity, Bleeding Disorders, Craniofacial Syndromes, and Office Medical Emergencies. Kenneth L. Shive, MD, Executive Vice Chancellor for Health Affairs of the University of Texas System, will deliver the keynote address entitled The Changing Healthcare Scene.

Our Mission
Dell Children’s Medical Center of Central Texas is a center of excellence for Central Texas consisting of a strong alliance of expert personnel, facilities and other specialty resources dedicated to the care of children and adolescents within a 46-county referral region. We believe no child should be refused necessary care and attention for lack of ability to pay.

Pediatric Dentistry Program
The Pediatric Dental Medicine Program located within the Dell Children’s Craniofacial & Reconstructive Plastic Surgery Center provides a unique resource to medically complex patients, their families and their care teams. Systemic conditions and their corresponding treatments often have a significant impact on patients’ oral health and overall well-being. Our program uses the multi-specialty collaboration available at Dell Children’s to gain a detailed understanding of patients’ medical treatment in order to provide the best dental care for our young patients.

Learning Objectives
At the conclusion of this symposium, participants will be able to:
- discuss the dental implications of conditions such as epilepsy and craniofacial syndromes
- identify appropriate laboratory coagulation studies for patients suspected of having bleeding disorders
- describe the changes occurring in the healthcare scene and its impact on dentistry
- evaluate how sleep apnea can affect your patient
- evaluate how dentists can become involved in the prevention and treatment of childhood obesity
- implement sedation emergencies management in the dental office for children with chronic medical conditions

Target Audience
This conference is appropriate for dentists, dental hygienists, dental assistants, dental support staff members and dental residents, especially those who provide care to children.

Teaching Methods
The program will consist of live lectures organized by topic. A question-and-answer session will follow each presentation. Handout materials will be provided and archived on the conference web site.

Continuing Education Credit
8 hours available for dentists, dental hygienists and dental assistants.
