Care team

Our Pediatric and Adolescent gynecologists are board-certified obstetrician-gynecologists who have completed subspecialty training in pediatric and adolescent gynecology and minimally invasive surgery in children. Using the latest technology, our care team provides routine gynecologic care as well as treatment for abnormalities of female development, puberty, minimally invasive surgery in children, and other gynecologic disorders, such as adnexal masses. Patients are cared for by a dedicated multidisciplinary care team, meaning families will benefit from the expertise of multiple specialists across a variety of disciplines.

Led by Dr. Afriyie-Gray, our team of subspecialty-trained pediatric and adolescent gynecologists have extensive experience and work alongside a team of pediatric experts, including advanced practice providers, dietitians, social workers, child life specialists, and more, providing unparalleled care for patients and families every step of the way.

Partnership with UT Health Austin

The collaboration between Dell Children's and UT Health Austin, the clinical practice of the Dell Medical School at The University of Texas at Austin, brings together medical professionals, medical school learners, and researchers who are all part of the integrated mission of transforming healthcare delivery and redesigning the academic health environment to better serve society. This collaboration allows us to provide you with a team of highly specialized providers who are at the forefront of the latest research, diagnostic, and technological developments.

Pediatric and Adolescent Gynecology is committed to providing a multifaceted continuum of care, coordinating patient care with referring physicians and other care team members to ensure patients receive the highest level of specialized care and experience a seamless transition from pediatric to adult care.

For patient referrals and scheduling, please call 512-324-0970 or fax referral form to 512-324-0971.
