

Certain specialty medication prior authorization requests may require additional documentation

As part of our ongoing quality improvement efforts, Dell Children's Health Plan is updating our prior authorization processes for certain specialty medications listed below. Effective August 1, 2021, we may request additional documentation for impacted medications to determine medical necessity.

Upon request, providers shall submit documentation from the member's medical record for each policy question flagged for documentation. A denial may result if documentation does not support medical necessity or if documentation is not submitted.

Should you have any questions, please refer to the [Clinical Criteria policy website](#) for specific medication criteria details.
