

11/12/2021

Provider Enrollment Functions Available through PEMS beginning Dec. 13

Background:

Provider Enrollment Management System (PEMS) will automate and streamline the provider enrollment process by removing the requirement to use paper forms, simplifying the process for providers to complete their National Provider Identifier (NPI)-based enrollment. Providers or individuals who do not provide health care services and who are not required to have NPIs may have been issued Atypical Provider Identifiers (APIs). These providers should use their APIs.

Key Details:

The Transition Period is effective Dec. 1, 2021. The last day to submit electronic enrollment applications, fax requests, electronic maintenance requests, or submit these items through Provider Enrollment on the Portal (PEP) or Provider Information Management System (PIMS) is Nov. 30, 2021.

Providers planning to submit paper enrollment applications, fax requests, or maintenance requests should be aware that after Nov. 30, 2021, these will no longer be accepted.
